Finally, after years of research, a way of eliminating breast cancer has been revealed!

**“Women: *Eliminate Breast Cancer and Not Your Breast* - While Developing a Healthy Body That Will Take Care of You For Years to Come!”**

*Medical, Fitness, and Nutrition Expert Reveals Never Before Seen Methods That Will Eliminate Breast Cancer From Your Body Forever!*

\*\*\*\*\*

From the Desk of Buz

**Dear Ladies:**

Oh, no. You've just been diagnosed with breast cancer. Your life is over. You begin to prepare your will. You even contact your next of kin for instructions on your burial.

The minute you hear you have breast cancer; you go right into panic mode. I mean who wants to have breast cancer, right??

You may have a family to take care of. If not a family, you may have a husband or boyfriend; you planned on spending many years with.

Unfortunately, according to the American Medical Association and the American Cancer Society, breast cancer is the number one disease of women, especially after 20 years of age, and the second leading cause of death. Why is this happening?

## **Some Important Reasons Why Women Age 20 and Older Get Breast Cancer!**

The problem lies in several areas.

In some women, breast cancer seems to form if their **menstrual cycle starts too soon**. The average age for a menstrual cycle to start is about age 12. But for those that begin earlier, these are the women who run the risk of getting breast cancer sometime in their lifetime, **particularly before they hit 30. Another cause is late menopause**. If a woman has menopause after 50, it causes the system to have an adverse reaction. The hormones change too late. **Having a diet filled with too much saturated fat can cause breast cancer**. A diet that includes monounsaturated fats like canola oil and olive oil does not appear to cause or increase the chance of breast cancer. **Many types of breast cancers are inherited**. If the family has a history of breast cancer, it is very likely to

be passed on to later generations. So if you had a great-grandmother, grandmother, mother, sister, or cousin, who had breast cancer, you may get it to. **Women who take estrogen replacement therapy** also can cause breast cancer. This is true if the therapy has been extended up to 10 years.

If you happen to be a woman who has been blessed without having healthy breasts, you owe it to yourself to get educated about breast cancer, so you can take the steps required to prevent yourself from getting it.

When you think about it, you may be one of those who see yourself as having breast cancer and think life is over for you, or you lose interest in sex, relationships, work, or even spending time with friends.

**If you are, I have news for you. You are not alone.**

## There Are Many Women Just Like You...

There are millions of women in the United States alone who fight breast cancer daily.

According to records, every second one woman is having a mammogram or MRI done to see whether or not breast cancer is present.

Once the diagnosis is made, the next step depends on the results.

If you are diagnosed with breast cancer, the doctor usually prescribes chemotherapy to get rid of it, which can have serious side effects. Or he may recommend you have your breast removed to prevent spreading of the disease.

Keep in mind that if you are a woman 20 years or older, the likelihood of you getting breast cancer increases. **So there is a cause for concern.?**

But sitting in a chair or looking at a mirror and feeling sorry for yourself won't get rid of it for you. It will just make matters worse. **You need to take action. ?**

## I Knew Someone Like You At One Time...

You may not believe this, but I had a friend who was like you at one time. She was a beautiful woman. She had a husband and three children. She lived the life she always dreamed of.

One day, she felt something strange in your breast. And then while intimate with her husband, he noticed one of her nipples had blood oozing out.

He jumped up and told her about it. She ran to the bathroom and checked, and noticed more blood coming out.

She was taken to the hospital where an MRI was done and they discovered she had a lump right behind the nipple. This is why blood was coming out of the nipple.

She went to her doctor the next day and the doctor performed a series of tests and found she had a cancerous tumor.

She was devastated. She did not know what to do. She went home and did research to find a way to get rid of the tumor without surgery or taking harsh chemicals.

I wanted to help her. So I went on a long journey of self-discovery. I did a lot of research. I talked to experts in the fields of medicine, health, nutrition, and physical fitness.

After talking to every expert I got my hands on, I began to put all the pieces of the puzzle together. I tested certain things and re-tested.

After nearly 20 years of experiments and testing, and further research, I realized what it was I had to do.

I began to combine many methods and techniques. I studied the human body and learned how the immune system worked. I took this

knowledge and combined it into a book and gave it to my friend. She read it, applied it, and found within three months her tumor disappeared.

## The Proper Lifestyle Will Get Rid of Your Breast Cancer

There are many treatment options available to help get rid of your cancer. The best method, according to many doctors and nutritionist, is the food you eat.

According to research studies, foods that have healing properties are the best to consume, in order to get rid of breast cancer. **These foods are listed in my book. ?**

There is a function of the human body that not too many people think about, but without it we could die. This function helps with absorption. **It is fiber.**

Fiber works by absorbing water as it moves through the digestive track. This action forces the undigested matter to become larger, which in turn moves the fecal matter out of the intestines faster, this way the fecal matter can be excreted quickly so it won't do any harm to the body.??

There are many foods that contain fiber. **My book contains a list of them.**

Over indulgence in alcohol can also cause breast cancer. So how much can you drink? **My book tells you.**

There is one other factor that has been known to really cause breast cancer. Read my book to find out what that factor is.

Do you know that exercise helps to eliminate breast cancer?

**Read my book** to find out what exercise and how often you need to do it.

**So what is my book already?**

My book is "**Winning The Fight Against Breast Cancer**".

Within the pages of my book you will learn how to eliminate breast cancer or prevent it if you do not have it already.

## What Do You Get For Trying My Methods?

My methods are tried and true. They work. Ask any woman who has had breast cancer and tried my program. They will tell you first hand that what I am providing you is not a bunch of crap, or just more bull.

**Here is a list of reasons why you should use my methods:**

**To help you cope with your breast cancer as you take steps to get rid of it for good.** To put in your hand a guide that will teach you how to eat correctly. **To put in your hand a guide that will give you the reason and purpose for why you developed breast cancer and what you need to do about it.** To teach you the proper way to exercise that will benefit you in the short and long term. **To help you develop a body that will be free of breast cancer.**

If you take to heart my program and do exactly what it says, and apply it to your everyday life, **the next time you go to your doctor, you will be pleasantly surprised. ?**

There have been people who took to heart my instructions and found their breast cancer **went away within two to three months.** Some found relief sooner, depending on the stage the cancer was in.

You may not experience the same results, but if you follow my program closely, you will find your body responding in kind and you will begin to feel better, have more energy, and even enjoy sex again.

## Why Should I Believe You When There Are Many Other More Publicized Books On the Market That Talk About Breast Cancer?

**That is one great question.**

For one reason, all those books on the market tell you how to deal with breast cancer, **not how to get rid of it, or how to prevent it.**

After years of research and testing, I found that those who knew the reason they developed breast cancer took steps to educate themselves so they would know how to get rid of it and prevent it from returning. ?

At that time they applied my methods and found their breast cancer went away in a short period of time, never to return. In some cases, the doctor they went to were amazed by what happened. ?

Plus, my methods are not found online or in bookstores. After doing years of research, I took what I found, compiled it into notes, and modified what I wrote.

When I came up with the solution that worked, I destroyed the original copies so no person could steal what I had created originally. ?

I took the only copy I had and formulated it into book form, so I could use it to help my friend. However, I started reading about other women with breast cancer and felt terrible for them. ?

I realized I had the answer sitting on my desk and converted it to e-book form so I could provide it to every woman who was suffering from breast cancer. ?

**I had the power to help them,** so this is why I am offering my e-book to you today.

\*\*\*\*\*

I found out I had breast cancer a few months ago. It was in its early stage. I did not want to go through any

chemo. I hated to have any drugs in my body. I did a lot of research and contacted several doctors, all with the same answer. Either I had to get surgery or go through chemo. I didn't want that. Then I bought your e-book. After applying what I learned, I went back to my doctor in three months and got tested. My breast cancer went away. Thank you so much. ?

**Sandra Jordan**  
**New York**

My wife had developed breast cancer last year and was on chemo. She lost her hair and everything. She got tired of it. The last test she took showed the cancer was beginning to spread. They said she needed to have her breast removed. She got scared. A friend of mine suggested I try your book. So I went online and bought a copy. I gave it to my wife and she took to heart everything in it. Within three weeks her hair began growing back. She went to have another test done and found her cancer gone. I owe you one. ?

**Ed McHugh**  
**New York**

\*\*\*\*\*

Okay, now you heard from a couple of customers, you are wondering what my product will cost. Well what if I told you I was offering it for a low price of \$47 \$37.

Yeah, you read it correctly. I said \$47 \$37. I am offering it at such a low price because I want to give you the chance to have it, so you can use it and get healthy.

However, even at that low price you may be skeptical about ordering it.

Well, what if I told you I was going to offer it to you for FREE. That's right. I am going to give you a no-risk tryout to see if you will like it or not.

So what I am going to do is remove all the risk from your shoulders. I will absorb all risk and I will offer you my;

**Rock-Solid, Iron-Clad, No-Risk**  
**100% Money-Back Guarantee!**

I will provide you with my **100% money-back guarantee** and give you a no-risk trial to try out my Learn What Breast Cancer is and How to Eliminate or Prevent It book.

If for whatever reason you find your breast cancer has not gone into remission or your cancerous tumor has not dried up within 6 month, let me know and **I'll fully refund your money.**

That's how confident I am in my system. **So there's absolutely no risk whatsoever.** I take all the risks. ?

To your improved health and success,

Buz

**P.S.?** Many women have obtained a copy and have seen?dramatic results. Don't wait. Get Your Copy NOW and get rid of your breast cancer now. ??

**P.P.S.?** The low price will only last but so long. Take advantage of this special pricing now before the price does go up.
